

Did you know?

The American Solar Energy Society says that enough sunlight falls on the Earth's surface each minute to meet the world's energy demands for an entire year.

Goal

Encourage the use of energy in a clean and efficient manner and the use of renewable energy sources

What can you do?

- Use energy-efficient products, such as compact fluorescent light bulbs and *Energy Star* appliances
- Plant trees to shade your home and reduce the need for air conditioning
- Go Solar - The benefits of solar energy are many and incentives are available from the State and local energy providers

What the City is doing:

- Installing solar panels and energy-efficient upgrades on City-owned buildings
- Encouraging energy-efficient upgrades to new and existing buildings
