

Did you know?

It is important to encourage development that limits or reduces energy consumption, construction waste, air pollution and the amount of time people spend in vehicles.

Goal

Foster an energy-efficient, walkable community that provides ample goods, services and benefits to all residents while respecting the local environment

What can you do?

- Walk or bike to shopping areas, parks and community centers
- Use sustainable concepts when remodeling your home
- Plant a vegetable garden

What the City is doing:

- Setting energy efficiency and green building requirements for new buildings
- Providing parks throughout the City
- Planning bicycle routes
